

UNESCO i-WSSM & KIGAM Summer Program on Groundwater Management and Natural Heritage

In coming summer, UNESCO International Center for Water Security and Sustainable Management(i-WSSM) and Korea Institute of Geoscience and Mineral Resources(KIGAM) will launch a **special program for water-related professionals and international students.**

If you are interested in groundwater, which is the most arising issue in the field of water-security, along with the natural heritages in Korea please join us and apply for the program! This program will provide you a fruitful water-management knowledge and meaningful cultural experiences.

Program theme	Date	Venue	Participants	Fees*
Groundwater management/ Natural Heritage	2023.7.24.~28. (5 days)	Daejeon and Jeju	10 Participants	Free**

* Includes tuition, accomodation and meals during the program

** To promote new leaders in water security in the next generation, the program is funded by organizers.

Target

Any international students, officials, professionals from countries included in the <OECD DAC's List of ODA Recipients>, who are currently **enrolled in universities in Korea with water-related major.**
