

## [Fire and Earthquake Evacuation Drill for dormitory residents for the 2023-1]

1. When the siren sounds in dorm, exit the room and come down to the first floor. When the broadcast says "evacuate," follow the instructions of the guide and evacuate outside of the building.
2. There will be demonstration of extinguishing a fire by spraying a fire extinguisher in front of the building.

※ In case of a fire, inform that around you, report to the fire station, extinguish the fire with a fire extinguisher, and evacuate quickly.

1) How to use a fire extinguisher

- Pull out the safety pin, approach the fire, aim at the base of the flames, and squeeze the lever.

2) How to use an indoor fire hydrant

- Open the valve, stretch out the hose, grip the nozzle, and extinguish the fire.

### 3. Earthquake Evacuation

1) Quickly get under a desk or bed and hold onto the desk or bed legs.

2) When the earthquake stops, turn off the electricity switch, close the gas valve, and open the door.

3 ) Protect your head with a bag, blanket, etc., and evacuate outside through the stairs avoiding the building's walls.

4) Exit to a wide outdoor area.

※ In case of a fire or earthquake, evacuate vulnerable individuals like children, the elderly, etc., first.

**After the training, receive an attendance slip from the supporters at the dormitory entrance, fill in your information, and submit it immediately to be counted as present.**
